

Science-1A Students,

In the e-mails about Lecture and Lab notes for Week-09, I used a link that started with '*http://*' instead of the more correct start of '*https://*'. That error might have caused your browsers to be unhappy about linking to a "not secure" web site. Using '*https://*' should make them not complain.

I have fixed the e-mail contents listed in <https://yosemitefoothills.com/Science-1A/E-Mails> .

Craig
