

Science-1A Students,

This is a copy of the text sent with the Final Exam. You should have separately received your version of this text with your Final Exam attached.

I am grading the Chemistry Midterms as quickly as I can. I might not be done for a couple more days.

Please check out the things that might interest you in my suggested reading for the summer at

<https://yosemitefoothills.com/Science-1A/VacationReadingSuggestions.pdf>

and consider my suggestions at

<https://yosemitefoothills.com/Science-1A/ComputerScienceForKids.pdf> .

Also, I have usually found time in my in-person lectures to discuss some matters about healthy eating. Although, I have not done so this semester, you can find some handouts about that topic in the handout lists.

There are also some video links at <https://yosemitefoothills.com/Science-1A-Fall-2020/LabNotesAndLinks/FattyAcids/index.html>

Here is the Final Exam. You should have already read the information note at

<https://yosemitefoothills.com/Science-1A/QuizAndTestPractice/InformationAboutChemistryTestAndFinalExam.pdf>

This is due by the night of Friday, December 10, but an extra day is possible. It just makes my grading more difficult.

You may only consult clean versions of our Periodic Table and Equation Sheet.

Pay close attention to any unit prefixes!

Be sure to show your setup formula with all appropriate units.

If you have problems printing this, you can just write the answers with question numbers on a piece of paper and send that. If you need to do that, be very careful that you don't overlook any questions or parts of questions when doing so!

Good Luck

Craig
